

DISABILITIES

Transferring, Moving and Repositioning People
Safely

ONLINE COURSE

LEARNING OBJECTIVES

- Understand the importance of assessing a person prior to repositioning or moving them
- Identify the appropriate equipment, correct technique and number of carers required to reposition people safely

COURSE OVERVIEW

This course provides comprehensive manual handling training and assessment for carers and students working in disability services.

It covers procedures to safely reposition people on the bed and transfer them on and off the bed, chair and other activities of daily living. It includes the use of slide sheets, hoists, wheel chairs, bed mechanics, shower trolley and other equipment.

The course is divided into five learning modules and includes a case study, step by step description and a short vignette of each task and a quiz to test knowledge.

The assessment consists of 20 randomised questions. Participants need 80% to pass with 3 attempts.

BENEFITS

- **Standardises practices; improves care, reduces risk**
- **Complies with national health and safety legislation, Disability Act and is endorsed for Continuing Professional Development (CPD)**
- **Designed by experts - contemporary practice**
